TWIN AS DIALECTIC

Do you think that environment is solely responsible for our differences in personality. I do not, and I find it totally absurd that people can go in to print saying such things as Peg's Christmas calendar present to me says for Saturday, November 10, 1984.

monozygotic, adj. : developed from a single fertilized ovum, as identical twins; enzygotic

Monozygotic twins are the best specimens for measuring the different effects of environment on the personality, since they are born genetically identical.

You know as well as I do that personality is very little (if at all) influenced by environment.

The differences between us are caused by more than environment. We are both self-aware enough, and articulate enough, that we can put to paper some thoughts concerning this question. We could ask all those who know us to put their thoughts on the question to paper.

How are we different ?
How are we alike ?

What features of us does RTP have.
What is sibling similarity : what do we three brothers share ?

WHO'S WHO IN Proust

As Marcel Proust lay in bed re-creating the Belle Époque past, Paul Nader was busy making his own collection of the same people in his photography studio on the Boulevard des Capricieux. Though Proust denied the similarities between his studio and the Belle Époque, Paul Nader was busy making his own collection of the same people in his photography studio on the Boulevard des Capricieux. Though Proust denied the similarities between his studio and the Belle Époque, Paul Nader was busy making his own collection of the same people in his photography studio on the Boulevard des Capricieux.
